Extended Abstract

This document is a template for preparing the 2 page extended abstract for AEDSS2014 using Microsoft Word 2003 or later. The styles and formats for the AEDSS 2014 template have been incorporated into the structure of this document. If you are using Microsoft Word, please use this template to prepare your manuscript. The extended abstracts will go through a peer – review process and those accepted for presentation will be published in Abstract book and issued to delegates at the symposium. Abstract must contain no more than 600 words, Arial Narrow, 11pt, bold.

Keywords: Maximum 5 keywords.

1. Introduction

A general guide might be a total length of 2 A 4 size pages (approx. 600 words) including no more than 2 figures or tables and no more than 5 references. All texts should be single line spaced, in Arial Narrow, 11pt font size consistently. The title is centered, bold Arial narrow 14pt restricted to only one line, authors names are centered, in bold Arial narrow 12pt, and affiliation is Arial narrow 12pt (not bold). The email address of the presenting author must be provided. The Extended Abstract begins with a short abstract and ends with a conclusion section. This is concluded by a short list of no more than 5 selected references. Do not use foot notes. Leave one space between two sentences. The deadline for submission of extended abstract is 7th April 2014. The extended abstract shall be peer reviewed by expert committee. The notification of acceptance shall be made within 72 hours of the receipt of abstract.

2. Formulation

This template provides authors with most of the formatting specifications needed for preparing their extended abstract. The extended abstract must be written in English. All abstracts must be prepared in English. Text is full justified with Margins of 1 Inch all around the text in A4 size paper. The extended abstract including figures, tables and reference must have a maximum size of 2 pages. Maximum permitted file size is 4MB. The main heading should be left aligned in bold faced 11pt. There should be a space before and 6pt space below after the main headings. The normal text within paragraph must be written single spaced justified in one column. The spacing between paragraphs is 12pt. References should be cited in the text as Spencer et al [1]. The equations can be made using the equation editor. A displayed equation is numbered using Arabic numbers in parenthesis as shown in equation (1). The equation is 12pt font centered, with 6pt spacing above and below the equation to separate it from the surrounding text.

$$(1+x)^n = 1 + \frac{nx}{1!} + \frac{n(n-1)x^2}{2!} \quad (1)$$

3. Result

All figures should be numbered consecutively and captioned. The caption title should be written centered, with sentence case letters. A 6pt space should separate the figure from the caption, and a 6pt space should separate the upper part of the figure and the bottom of the caption from the surrounding text. The figures must be referenced in the text as Figure 1. A sample figure is as shown below

Figure 1. Speed time graph

Table 1. Displacement and strategy

Strategy	Displacement (cm)	Interstory Drift (cm)	Acceleration (cm/sec ²)
Uncontrolled	0.547	0.547	873.69
	0.835	0.318	1069.4
	0.971	0.202	1408
Passive On	0.079	0.079	273.96
	0.1952	0.157	495.96
	0.3044	0.11	767.15

4.Conclusion

All tables should be numbered consecutively and captioned. A 6pt space should separate the table from the caption, and a 6pt space should separate the upper part of the table and the bottom of the caption from the surrounding text. The tables must be cited in the text as Table 1. A sample table is as shown below.

5.Acknowledgement

Extended Abstracts in format for publication should be submitted by email as directed on the symposium website before the deadline. The maximum size of the file is 4 MB.
